

ZOK has formulated and manufactured gas turbine compressor cleaning fluids since 1980.

ZOK have extensive experience of delivering long-term commercial and environmental benefits to our worldwide customer base via our dedicated global distribution network.

Aviation

ZOK cleans gas turbine compressors in challenging and changeable environments – so it's no wonder that the MoD and civil aviation companies from around the world have been using ZOK for over 35 years to keep their jet engines in peak condition.

Military

Since the early eighties the MoD have relied on the cleaning power of ZOK to keep their rotary and fixed wing aircraft in peak condition.

Oil / Gas

ZOK cleaning products are biodegradable and water-based. Specifically designed for use in ecologically sensitive environments, they are approved by all leading engine manufacturers.

Power Stations

ZOK is an international brand used to clean all types of gas turbine compressors from the smallest unit to the largest power generating engines.

ZOK Approvals

ZOK is approved by Major Gas Turbine Original Equipment Manufacturers (OEMs), including:

Distribution Network

In 40 markets worldwide ZOK's global stock holding distributors near to you can quickly provide ZOK products. This means any of the 4 GT compressor cleaning solutions are near at hand ready when you need them most.
